1531 Project Iteration 3 Meeting 1

Date	20/07/22
Time	8 PM
Location	Microsoft Teams
Purpose	Initial Iteration 3 Meeting
Present	Alexa, Charlotte, Emmie, Joseph, Jason
Apologies	-
Minutes	1 hour

Agenda

Topic	Discussion	Action Items
Going through specifications and iteration 2 results	We went through the Iteration 3 specifications and discussed which functions should be done first and which can be left for later on. We also went through the results from iteration 2 and talked about the tests that we failed and how to ensure we fix these issues.	Fix errors from iteration 2
Assigning functions	Assigned the functions as follows on the Google Sheet: 📅 Iteration 3 - Either fixing implementation, adding new error cases or new functionality	
Determining a day for the next standup	We chose Saturday to do a standup to give everyone enough time to fix iteration 2 errors and begin fixing the implementation of our past functions to fit in with the new specifications in iteration 3.	Standup during Saturday afternoon
